MONTHLY REPORT FOR THE MAP LIBRARY DIVISION

February 1959

1. During February, 21,109 map sheets were forwarded to requesters in response to 1,431 map requests; and 851 publications were distributed in response to 157 requests for geographic publications. More requests were received this February than in any previous February. Requests for maps on the North Atlantic Ocean, Germany, Berlin, and Africa increased during the month, reflecting the current situation in these areas. 143 place name questions were answered, and 229 requests for miscellaneous information. During the month, 29 members of the Department of State did research in the Map Library.

2. Requests for ATMP materials have been increasing consistently. This month, in addition to the above-mentioned general requests for maps and publications, the Reference Branch serviced 123 requests for ATMP charts, and 23 requests for text items. 3,951 charts and 489 text items were forwarded to requesters to fill these requests. These totals do not include the charts and publications which the ATMP Unit forwards on automatic distribution.

3. The Reference Branch is considering converting the work load of Reference personnel to a regional basis. It is planned that individual areas of responsibility will be assigned to the various Reference Branch Officers, instead of continuing the present practice of having each Officer handle requests on all areas. Currently, a trial is being run, with Mr. [REDACTED] handling all detailed requests on the USSR and European Satellites. This arrangement is proving satisfactory, and is developing closer coordination between the Reference Branch, the Processing Branch, and the Procurement Branch.

4. During the month, it became apparent that the ATMP Unit was not receiving regular shipments of SAC charts from ACIC, St. Louis. This problem was discussed with Mr. Haff, ACIC, and two weeks later the Map Library received a shipment of 6,552 charts, the backlog of missing charts.

5. The Cataloging and Indexing Section added 788 new titles comprising 3,022 sheets, to the Loan Copy Collection. 396 atlases and atlas-like volumes were processed, and, of these, 334 were added to the Reference Collection for permanent retention. 109 maps were processed for Vital Storage.
